**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/US99/06429

I. Basis of the report

1. This report has been drawn on the basis of *(substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.)*:

Description, pages:

1-17 as originally filed

Claims, No.:

1-19 as originally filed

Drawings, sheets:

1/4-4/4 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/US99/06429

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims 2-19
	No: Claims 1
Inventive step (IS)	Yes: Claims
	No: Claims 1-19
Industrial applicability (IA)	Yes: Claims 1-19
	No: Claims

2. Citations and explanations

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US99/06429

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step and industrial applicability; citations and explanations supporting such statement

Document D1=US-A-5719918, cited in the international search report, discloses (see the passages cited in the search report), in accordance with the features of independent claim 1 of the present application, a

method for remotely monitoring or controlling activities within multiple facilities geographically dispersed within at least one wireless network adapted to transmit GSM short messages to allow the facilities to communicate with other terminals without making a wireless telephone call (see column 5, lines 57-63, as well as the passage cited on columns 14 and 15), the method comprising

- (a) providing the selected facility with a gateway comprising a processor, a transceiver and a SIM card adapted to transmit short messaging service messages (column 6, lines 31-33);
- (b) periodically causing the gateway to formulate a short message reporting on activities within the selected facility at which the gateway is located (column 6, lines 51-52);
- (c) transmitting the message over the GSM network via Short Messaging Centre coupled to a Mobile Switching Centre within the GSM network; and
- (d) receiving the message at a terminal selected from a group of devices consisting of a mobile station, a workstation and a central processor (see abstract).

Document D1 thus discloses all the features of independent claim 1, which thus does not fulfil the requirement of Article 33(2) and (3) PCT.

No single available prior art document discloses the combination of features of the other claims, which therefore comply with the requirement of novelty of Article 33(2) PCT.

Independent method claim 13 however merely defines a generalisation of the subject-matter of claim 1 and therefore does not involve an inventive step (Article 33(3) PCT).

Independent claim 8 merely defines a system adapted to perform a generalisation of the method of claim 1, without defining any feature which could be considered as inventive in the light of document D1.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US99/06429

The additional features of the dependent claims are either already known from the documents cited in the international search report or matters of normal design. They consequently do not involve an inventive step (Article 33(3) PCT)

VII. Certain defects in the international application

The requirements of Rule 5.1(a)(ii) PCT are not met: Document D1 cited in the International Search Report is not identified in the description with the relevant background art disclosed therein being briefly discussed.

The requirements of Rule 6.3(b) PCT are not met: the independent claims are not properly cast in the two part form, with those features which in combination are part of the prior art (document identified in the description) being placed in the preamble.

No reference signs in parentheses have been inserted in the claims to increase their intelligibility, Rule 6.2(b) PCT.

The general statement in the description on page 17, line 24 refers to the "spirit of the invention". When used to interpret the claims, it indicates that the subject-matter for which protection is sought could differ from the subject-matter of the claims, thereby rendering the scope of the claims unclear (Article 6 PCT).

(54) Title: WIRELESS TELEMETRY METHODS AND SYSTEMS FOR COMMUNICATING WITH OR CONTROLLING INTELLIGENT DEVICES

(57) Abstract

Methods and apparatus are disclosed for remotely monitoring and controlling via a wireless network various devices deployed in homes and businesses. The present invention allows for monitoring and control of various gateways distributed to remotely located facilities to be monitored and the devices coupled to those gateways to be controlled via a wireless communications network. Preferably, the network is a GSM network adapted to provide short messaging services or any type of wireless network adapted to operate a General Packet Radio System for delivering data over the network. Messages are packaged at each gateway for delivery via the network to a destination terminal, whether a fixed terminal or a mobile station. Likewise, customers may forward data and commands to a particular gateway either from a mobile station or by accessing a fixed terminal, such as through an Internet connection. Transporting messages or commands via the short messaging service of the GSM network or via the GPRS protocol avoids the prohibitive cost of setting up a call for each message and avoids the significant capital costs needed to set up a separate communication network for data delivery.

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference BS100/176363	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/US 99/ 06429	International filing date (day/month/year) 24/03/1999	(Earliest) Priority Date (day/month/year) 24/03/1998
Applicant BELLSOUTH INTELLECTUAL PROPERTY CORPORATION et al.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.
☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

- a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

- b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing:

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☒ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

1
☐ None of the figures.
